OVERVIEW OF NATURAL RESOURCES IN DEVELOPMENT REGIONS

Pristina, 2024

This document is a product of the Ministry of Regional Development, and it should serve the needs of this institution, line ministries and other relevant actors, in regard to the drafting and development of programs with an impact on regional socio-economic development.

The document was drafted by:

Shyhrete Kastrati, Director of the Department for Regional Performance and Analyses

Qefseire Bajrami , Head of the Division for Regional Socio-Economic Analyses

Blinda Bytyçi, Officer for Balanced Regional Development

Consulted by: **Besim Kamberaj**, General Secretary in the Ministry of Regional Development

We would like to thank the Ministry of Environment, Spatial Planning and Infrastructure, the Kosovo Agency for Environmental Protection, the Kosovo Institute for Nature Protection who contributed to the realization of this document .

Introduction

In order to fulfill the activities towards the implementation of Law No. 08/L-190, the Ministry of Regional Development is responsible for the development of regional development policies and programs and inter-regional cooperation to reduce regional disparities.

The aim of the MRD is to continuously contribute to the balanced regional socio-economic development through the drafting of strategies, the implementation of programs, the preparation of analyses, and the drafting of various documents in order to influence the reduction of regional inequalities in all municipalities of the Republic of Kosovo. MRD operates with the implementation policies of its programs in seven (7) development regions with (38) constituent municipalities. Based on the Strategy for Regional Development 2020 - 2030, Strategic Objective: 3 Utilization of natural, cultural and human resources in the service of sustainable regional development, Specific Objective 3.1 Sustainable and promoted natural, economic, cultural and human resources, Department for Regional Performance and Analyses (DRPA), has prepared the document: "Overview of Natural Resources According to Development Regions". The Ministry of Regional Development MZHR/DPAR, in coordination and cooperation with the Ministry of Environment, Spatial Planning, and Infrastructure, the Kosovo Agency for Environmental Protection, and the Institute for Nature Protection, through the drafting of this document, aims to present an overview of natural resources for the seven (7) development regions of the Republic of Kosovo, based on Law No. 08/L-190 on Balanced Regional Development, where the number of development regions corresponds with the number of seven (7) statistical regions as per the NUTS-3 classification determined by the Kosovo Agency of Statistics.

The purpose of the document: is to assist the policy makers in their development towards awareness, protection of existing natural resources, and their utilization for other areas such as economic development/tourism and influence towards a balanced regional socio-economic development.

Methodology: in the drafting of this document, secondary data sources were used based on the findings from publications and various reports from the Ministry of Environment, Spatial Planning, and Infrastructure, the Kosovo Agency for Environmental Protection, the Kosovo Institute for Nature Protection, and the Kosovo Agency of Statistics. The document has undergone consultations between the internal structures of the MRD, MESPI, KEPA, and KINP.

Definitions :

Development region means the functional territory for the implementation of regional development policies, incorporated with balanced, economic, infrastructural settlements and natural systems, in a spatial community without differences where equal opportunities for balanced regional development can be provided;

Regional development is a general effort to reduce regional differences, by supporting (employment and wealth/welfare generation) economic activities in regions;

Regional inequality means the situation when we have substantial differences in several economic indicators (GDP/Capita; investments per capita; unemployment level, etc.) of certain regions compared to other regions but that is not all;

Balanced regional development means the process of reducing differences in terms of socio-economic development and quality of life in different regions;

Policies for regional development provide the framework for regional development and interventions in specific areas that will be aimed at achieving the goal of balanced regional development;

List of abbreviations:

MRD - Ministry of Regional Development

MESPI - Ministry of Environment, Spatial Planning and Infrastructure

KEPA - Kosovo Agency for Environmental Protection

INP - Institute for Nature Protection

KAS - Statistics Agency of Kosovo

SRD - Strategy for Regional Development

DRC - Development Region Center;

DRN - Development Region North;

DRW - Development Region West;

DRS - Development Region South;

DRSE - Development Region Southeast;

DRE - Development Region East;

DRSW - Development Region Southwest.

DRPA - Department for Regional Performance and Analyses

Natural resources

Natural resources are resources that nature provides for use, and their use can be divided into two basic categories according to their formation and origin.

Renewable resources: these are resources that can be used indefinitely without risking being destroyed forever. In example: **The Sun** : Solar energy is an inexhaustible source and supports the existence of life on **Earth**.

Wind: Wind energy can be used to generate electricity. **River water:** River water can be used to produce hydroelectric energy. **Flora and fauna** : Flora and fauna are natural resources that provide food and other materials for human use.

Non-renewable resources: these are resources that are used at a certain rate and can be destroyed or are resources that cannot be regenerated in a short time. For example:

Minerals: They include metals such as iron, gold, silver, etc., which are natural resources used for the production of various metals and materials. **Oil and natural**

gas: They are resources that form underground and are used for energy and various industrial products. **Coal:** The main use of coal is in the production of electricity; it is

also used to produce cement, but it is not a raw material for the production of cement and for other industrial uses.

The role of natural resources

An important role in the process of sustainable economic development, in addition to the use of these important resources, is played by the detailed overview of these economic resources throughout seven (7) development regions. This overview provides easy access to the identification of potentials and natural resources on a regional(municipality) basis for all investors and other relevant actors and interest groups for development opportunities to the general benefit.

Natural resources constitute one of the most important resources for economic development in Kosovo. Through the use of these natural resources, we influence the economic development and improve social well-being. In this document, the land and its features such as: (agricultural land, forests, vegetation, urban land, pastures, waters, and others) ¹, are presented with surface/Ha in the municipalities of the development regions of Kosovo. In this analysis, also waters and protected areas ²are presented in detail³, by municipalities in 7 development regions.

¹KEPA/ GIS System

²Report on the State of Waters, 2020

³Report on the State of Nature, Prishtina 2023

The list of natural resource assets is presented by:

- **the type of natural resource;**
- **designation of the natural resource;**
- **surface area, length, capacity;**
- **location of natural resources;**
- **other.**

It is worth mentioning that minerals, mineral energy resources and the utilization of water resources for economy purposes are reflected in the document: "Overview of Economic Resources in Development Regions".

Seven (7) development regions

Development regions according to the scope of the Ministry of Regional Development:

01 - Development Region - Center

02 - Development Region North

03 - Development Region West

04 - Development Region South

05 - Development Region Southeast

06 - Development Region East

07 - Development Region Southwest

01 – Development Region Center

It consists of seven (7) municipalities: **Prishtina, Podujevë, Graçanica, Obiliq, Fushë Kosovë, Glllogoc, and Lipjan**. This region has great potential for the development of natural resources. The list of natural resource assets is presented in tabular form.

"Gadime Cave" - Lipjan

07 – Development Region - Southwest

It consists of four (4) municipalities: **Gjakovë, Rahovec, Malishevë, and Junik**. This region has great potential for socio-economic development of natural resources. The list of natural resource assets is presented in tabular form.

"Ura e fshenjtë Bridge" - Gjakova

Table 54. List of natural resource assets – Development Region Southwest

OVERVIEW OF NATURAL RESOURCES				
Natural resource: Land				
DEVELOPMENT REGION - SOUTHWEST				
I. Category: Agricultural Land				
No.	Designation of the natural resource	Region	Surface Ha	km ²
1	Arable land with no irrigation	Southwest	18152	182
2	Arable land with no irrigation	Southwest	4146	41
3	The land is mainly occupied by agriculture, with significant areas of natural vegetation	Southwest	9817	98
Total		Southwest	32115	321
II. Category: Forests				
No.	Designation of the natural resource	Region	Surface Ha	km ²
1	Broadleaf forest	Southwest	44433	444
2	Coniferous forest	Southwest	4957	50
3	Mixed forest	Southwest	2871	29
4	Transient forest-shrubland	Southwest	13332	133
5	Bare rocks	Southwest	623	6
in total		Southwest	66216	662
III. Category: Vegetation				
No.	Designation of the natural resource	Region	Surface Ha	km ²
1	Sclerophyllous vegetation	Southwest	3	0
2	Area with sparse vegetation	Southwest	6275	63
in total		Southwest	6278	63
IV. Category: Urban land				
No.	Designation of the natural resource	Region	Surface Ha	km ²

1	Discontinuous urban fabric	Southwest	6015	60
2	Industrial or commercial units	Southwest	237	2
3	Road and railroad networks and associated land	Southwest	29	0
4	Airports	Southwest	102	1
Total		Southwest	6383	63
IV. Category: Pastures				
No.	Designation of the natural resource	Region	Surface Ha	km²
1	Pastures	Southwest	2984	30
2	Natural pastures	Southwest	7578	76
Total		Southwest	10562	106
V. Category: Fruit trees				
No.	Designation of the natural resource	Region	Surface Ha	km²
1	Fruit trees and berry plantations	Southwest	355	4
Total		Southwest	355	4
VI. Category: Water				
No.	Designation of the natural resource	Region	Surface Ha	km²
1	Water bodies	Southwest	564	6
Total			564	6
VII. Category: Other				
No.	Designation of the natural resource	REGION	Surface Ha	km²
1	Mineral extraction sites	Southwest	94	1
2	Landfills	Southwest	25	0
3	Sports and leisure facilities	Southwest	75	1
4	Complex cultivation patterns	Southwest	31385	314
5	Burnt areas	Southwest	15	0
Total		Southwest	31594	316
