OVERVIEW OF ECONOMIC RESOURCES IN THE DEVELOPMENT REGIONS

Prishtina, 2024

This document is a product of the Ministry of Regional Development and it should serve the needs of this institution, line ministries and other relevant actors related to the design and development of programs with an impact on sustainable socio-economic development.

The document was drafted by:

Shyhrete Kastrati, Director of the Department for Regional Performance and Analysis

Qefsere Bajrami, Head of the Division for Regional Socio-Economic Analysis

Blinda Bytyçi, Official for Balanced Regional Development

Xhevat Sefaj, Official for Socio-Economic Development

Vjendita Avdiu – Musliu, Former Head of the Division for Balanced Regional Development

Consulted by: **Besim Kamberaj**, Secretary General in the Ministry of Regional Development

We thank the Ministry of Economy and the Unit for the Management of Public Enterprises that contributed to the preparation of this document.

Introduction

In order to fulfill the activities towards the implementation of Law 08/L-190, the Ministry of Regional Development is responsible for the development of policies and programs for regional development and inter-regional cooperation to reduce regional disparities.

The aim of the MRD is to continuously contribute to the balanced regional socio-economic development through the design of strategies, the implementation of programs, the preparation of analyzes and the drafting of various documents, in order to influence the reduction of regional inequalities in all municipalities of the Republic of Kosovo. The MRD operates with the implementation policies of its programs in seven (7) development regions with (38) component municipalities. Based on the Strategy for Regional Development 2020 - 2030, Strategic Objective: 3 Utilization of natural, cultural and human resources in the service of sustainable regional development, Specific Objective 3.1 Sustainable and promoted natural, economic, cultural and human resources, Department for Performance and Regional Analysis (DPRA) has prepared the document: "Overview of Economic Resources in the Development Regions". The MRRD/DPRA, in coordination and cooperation with the Ministry of Economy (MoE), through the drafting of this document, aims to present an overview of the economic resources for the seven (7) development regions of the Republic of Kosovo, based on Law No. 08/L-190 on Balanced Regional Development. The number of development regions is in accordance with the seven (7) statistical regions according to the NUTS-3 classification determined by the Kosovo Agency of Statistics.

The purpose of the document is to help the regional policy drafters through the reflection of the potential of economic resources for balanced regional socio-economic development programs based on existing economic resources such as the mining

sector, development in the field of energy, and the importance and role of public enterprises and telecommunications.

Methodology: Secondary data sources were used in the drafting of this document. The data were received from certain sectors of the Ministry of Economy, findings, publications and from various reports published by the Ministry of Economy. The document has been consulted by the internal structures of the Ministry of Regional Development and the Ministry of Education on an ongoing basis regarding the data in this field.

Definitions:

Development region - means the functional territory that includes two or more local self-government units, in accordance with the criteria of NUTS-3, for the implementation of regional development policies, which is distinguished by a set of geographical, socio-economic, cultural, and environmental characteristics. The development region includes balanced regional socio-economic development in accordance with the Constitution and legislation in force and under no circumstances implies administrative or territorial organization;

Balanced regional development - means the process of reducing the differences in terms of socio-economic development as well as the approximation of the level of economic, social, cultural and environmental development between different development regions through the use of their potentials in terms of financial, natural and human resources;

Regional inequality - means the situation where substantial differences are evident between development regions according to socio-economic indicators;

Public enterprises - are basic units of manufacturing or commercial services within an economic system of a country with public ownership. The main components of the enterprise are the people, the raw material or material it processes, the technology it uses, the product or service it offers and the environment where it works.

Balanced regional development policies - mean the framework of strategic and planning documents of regional development with the aim of interventions in certain areas which will be implemented to achieve the goal of balanced regional development. Depending on the changes and advancement of the strategic documents, the regional development objectives will refer to and adopt the latest changes.

List of abbreviations:

MRD – Ministry of Regional Development;
DRPA - Department for Regional Performance and Analyses
ME – Ministry of Economy;
PE – Public Enterprise;
KEC – Kosovo Energy Corporation;
KAS – Kosovo Agency of Statistics;
MMC – Mines and Minerals Commission;
KP - Kosovo Post;
KT – Kosovo Telecom;
INFRAKOS - Kosovo Railways Infrastructure
TRAINKOS - Kosovo Railways;
PHC – Public Housing Company;
KDR – Kosovo Development Regions;
DRC – Development Region Center;
DRN - Development Region North;
DRW - Development Region West;
DRS – Development Region South;
DRSE - Development Region Southeast;
DRE – Development Region East;
DRSW – Development Region Southwest.

Economic resources

Economic resources are natural and material benefits that indicate the values of a particular society. Kosovo is recognized and rich in numerous economic resources that are generator of socio-economic development. In addition to the impact on the economy, these resources have a great impact on the well-being of citizens as well. Reflecting economic resources in development regions is a very important process that contributes to their effective management. This overview helps in identifying the location and current state of these economic resources, assisting and providing detailed information about these resources so as to use their potential towards balanced regional socioeconomic development.

The Ministry of Regional Development, through this overview of economic resources in the seven (7) development regions, aims to use these information for the design of policies and programs with regional impact by stimulating ideological projects with special access to economic resources, which may directly affect a balanced socio-economic development by reducing regional inequalities, thereby contributing to sustainable economic development in Kosovo.

Minerary resources

Constitute one of the most important sectors of economic development in Kosovo through the use of useful minerals affecting economic development and improving social welfare.

*Economic exploitation of mineral resources, attraction of investment, increased human and institutional capacity in the mining.*¹

In addition to using these important resources, the detailed reflection of these economic resources across the seven (7) development regions also plays an important role in the process of sustainable economic development in addition to using these important resources. This overview provides offers easy access to identifying potentials and economic resources on regional (municipality) basis for all investors and other relevant stakeholders for the possibility of development in general.

The list of mining resource assets is presented by:

- **Type of economic mining resource;**
- **Name of the mining rsource;**
- **Period of existence;**
- **Capacity;**
- **Location of mining economic resource.**

¹ Mining strategy for the period 2015-2017 (ME)

Energy resources

The energy sector is one of the most important sectors with an impact on sustainable economic development. This sector has a great impact on the industrial sector through manufacturing and on the agricultural sector where energy is used on a large scale. Furthermore, this sector has an important role in meeting the daily needs of households.

Energy security and sustainability are complex challenges and closely related to economic growth and the well-being of Kosovo's citizens, green recovery and sustainable development remain the main priority of energy-related policies.²

An important role is also played by the detailed overview of these economic resources through seven (7) development regions. This overview provides easy access to the identification of potential economic resources on a regional (municipality) basis for all investors and other relevant actors for development opportunities in the general good.

The list of energy resource assets contains:

- **type of economic energy resource;**
- **name of the energy resource;**
- **period of existence;**
- **capacity;**
- **location of economic energy resource.**

² Energy sector in Kosovo (PIPS-2022)

Public enterprises

They contain the list with the names of public enterprises in Kosovo operating in the seven (7) development regions: **Center, North, West, South, Southeast, East, and Southwest.**

The list of public enterprises contains:

- **type of enterprise;**
- **name of the public enterprise;**
- **period of existence;**
- **capacity;**
- **location of the economic enterprise.**

Seven (7) development regions

Development regions according to the scope of the Ministry of Regional Development:

01 - Development Region Center

02 - Development Region North

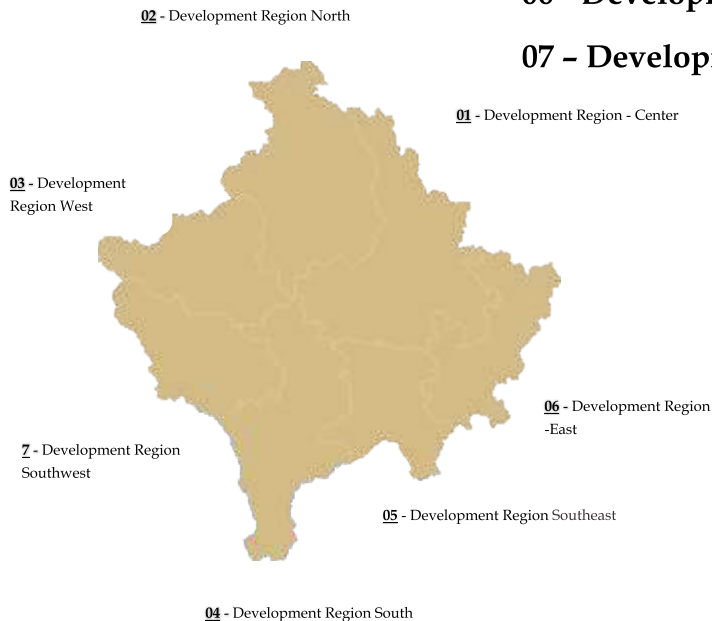

03 - Development Region West

04 - Development Region South

05 - Development Region Southeast

06 - Development Region East

07 - Development Region Southwest

01 – Development Region - Center

It consists of seven (7) municipalities: **Prishtina, Podujeva, Graçanice, Obiliq, Fushe Kosova, Glogoc, and Lipjan**. This region has great potential for the development of economic resources. The lists of assets of mining economic resources, energy resources as well as the list of public enterprises are presented in tabular form.
